

## How to use these 52 emails:

There are a total of 52 emails within these files. They are a combination of content and promotional emails. You will want to mix these up so your subscribers are receiving a combination of content and promotional vs a long string of JUST content or JUST promotional. For the promotional emails you will need to go to Clickbank.com and get your affiliate link to include in the emails. This will be the link customers will click on in the email you send out and if they click and buy through your link you receive the commission. But you will need to make sure you grab your affiliate link from Clickbank so the link is unique to you and you get credit for the sale.

Please refer to the document in this zip file called "Clickbank Offers" to find the clickbank products that you will need to grab your affiliate link for.
