Session 3: Customizing Your Website

- **Style Sheets** - Customizing your theme's default fonts, colors, headings, and so forth
- **Branding Your Website** - How to add your logo and header to personalize your design
- **Customizable Themes**- Learn to work with optional theme controls without writing any code

In This Class

Session 3: Customizing Your Website

- **Style Sheets** - Customizing your theme's default fonts, colors, headings, and so forth
- **Branding Your Website** - How to add your logo and header to personalize your design
- **Customizable Themes**- Learn to work with optional theme controls without writing any code

* Remember, all parts of your theme CAN be edited but such changes may require a professional coder

The benefits to you...

The benefits to you...

- **Save Time** - You'll learn how to quickly identify the extent to which your theme allows customization using the dashboard tools

The benefits to you...

- **Save Time** - You'll learn how to quickly identify the extent to which your theme allows customization using the dashboard tools

- **Keep Branding Consistent** - You'll be able to install a theme that lets you use colors, headers and logos that match your current business branding

The benefits to you...

- **Save Time** - You'll learn how to quickly identify the extent to which your theme allows customization using the dashboard tools

- **Keep Branding Consistent** - You'll be able to install a theme that lets you use colors, headers and logos that match your current business branding

- **Save BIG Money** - When you know how to achieve the look you want without hiring a web designer, you can keep all that money in your pocket... sweet!

How much can you customize?

Every Theme Includes a Style Sheet

How much can you customize?

Every Theme Includes a Style Sheet

- Style sheets are part of the background code that runs your website. They're also called Cascading Style Sheets (CSS).

How much can you customize?

Every Theme Includes a Style Sheet

- Style sheets are part of the background code that runs your website. They're also called Cascading Style Sheets (CSS).

- CSS dictates fonts, colors, margins, lines, spacing, backgrounds, and much more. Therefore, you will not find the same kinds of formatting tools in Wordpress that you're used to in Microsoft Word.
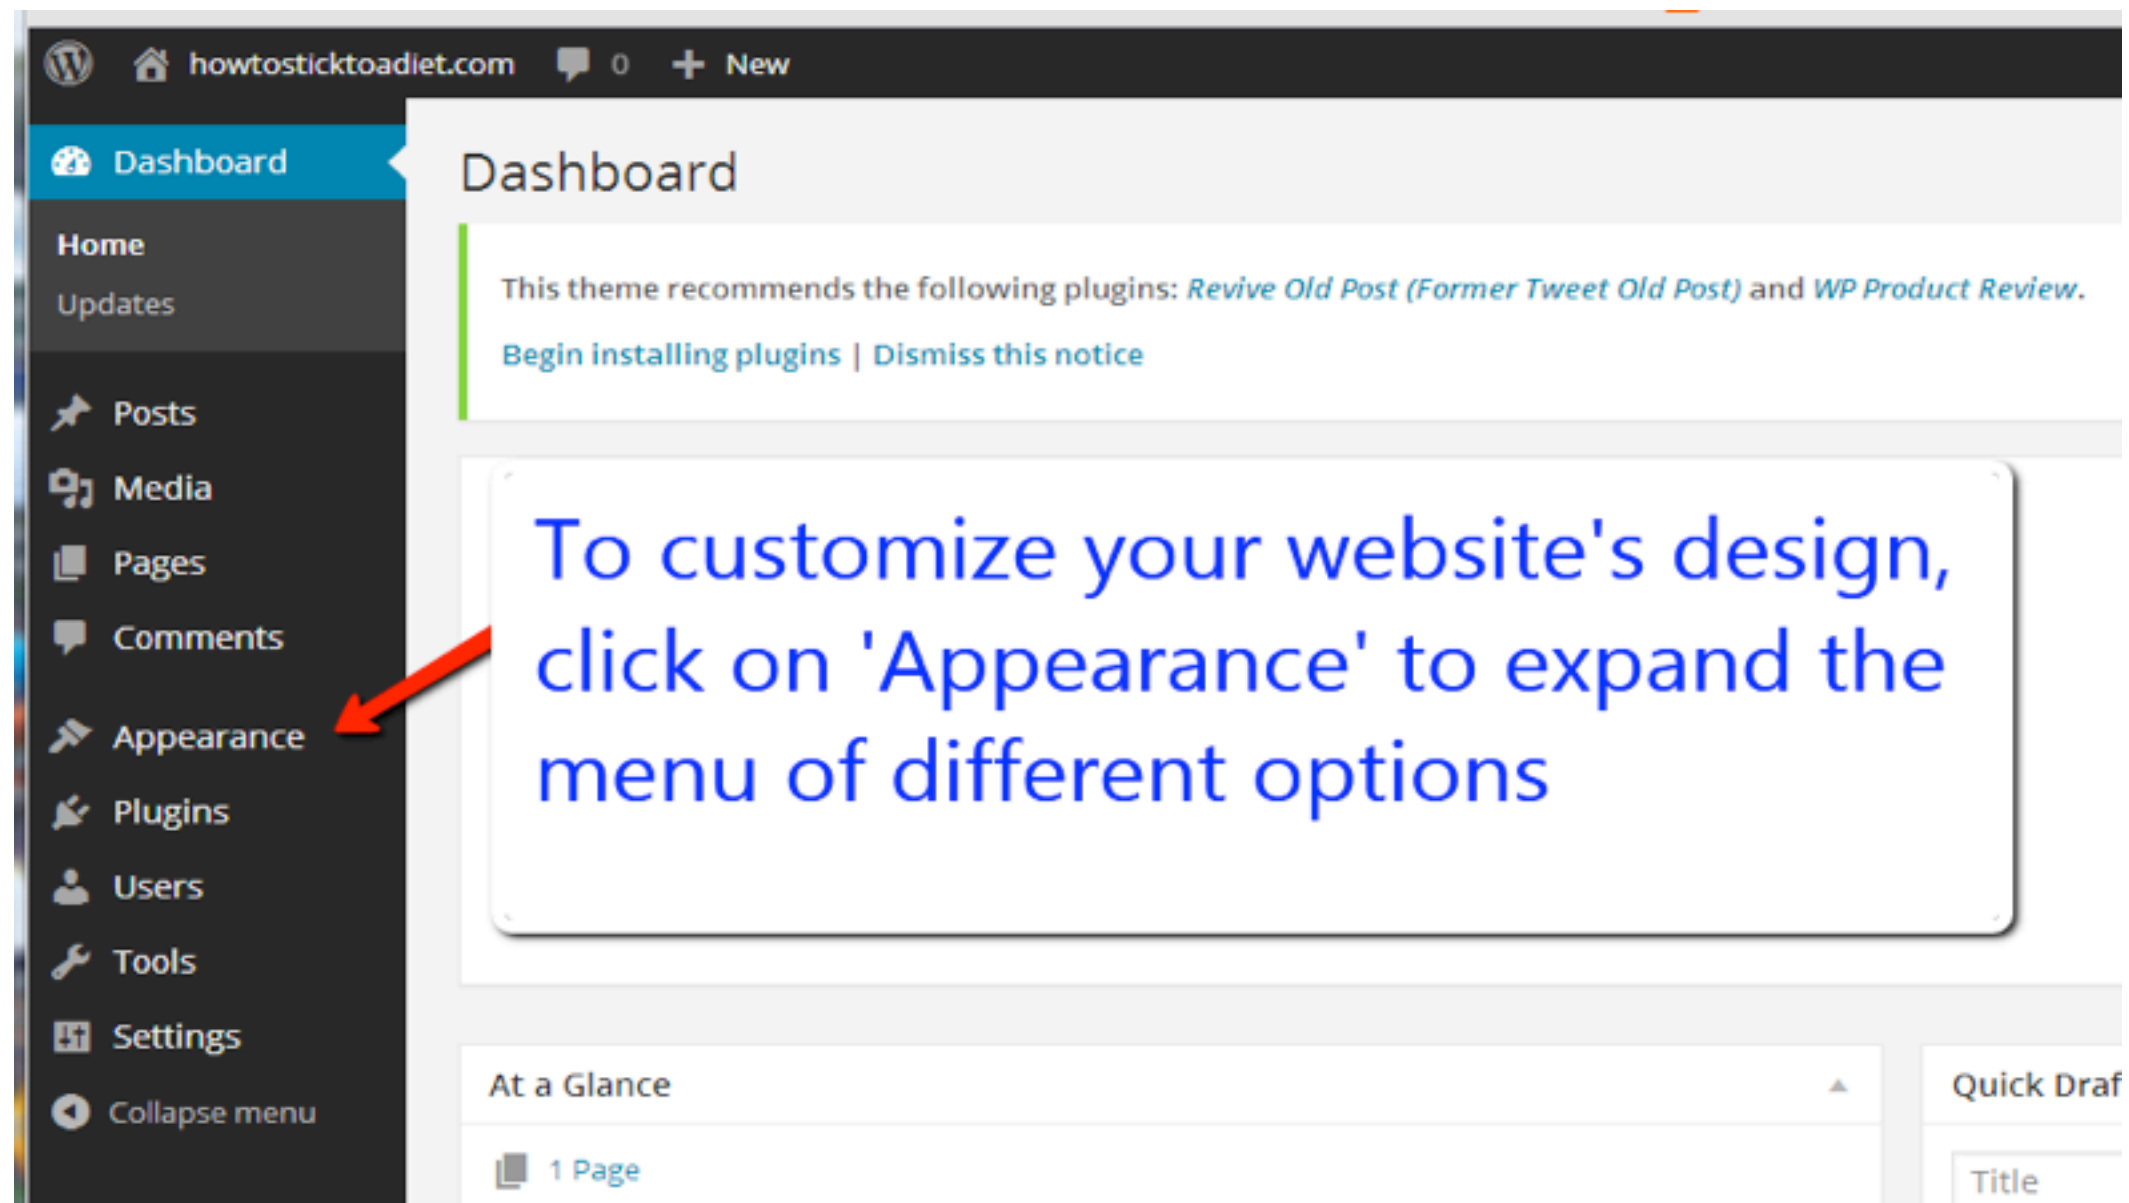

How much can you customize?

Every Theme Includes a Style Sheet

- Style sheets are part of the background code that runs your website. They're also called Cascading Style Sheets (CSS).

- CSS dictates fonts, colors, margins, lines, spacing, backgrounds, and much more. Therefore, you will not find the same kinds of formatting tools in Wordpress that you're used to in Microsoft Word.

- And, unless you know how to edit CSS or hire someone who does, you'll need to work with the default style sheet that comes with your theme.

How much can you customize?

TIP: No two themes are exactly alike. Let's go back

To customize your website's design, click on 'Appearance' to expand the menu of different options
