# Wordpress Pages versus Posts

# Wordpress Pages versus Posts

- A page is used for content that is static or permanent (it's important enough to keep visible)

# Wordpress Pages versus Posts

- A page is used for content that is static or permanent (it's important enough to keep visible)
- Pages are typically located under the main navigation menu as a parent or child page

# Wordpress Pages versus Posts

- A page is used for content that is static or permanent (it's important enough to keep visible)
- Pages are typically located under the main navigation menu as a parent or child page
- Posts are used for content that is new or dynamic (posts are part of your BLOG with the freshest content displaying before older content)

# Wordpress Pages versus Posts

- A page is used for content that is static or permanent (it's important enough to keep visible)
- Pages are typically located under the main navigation menu as a parent or child page
- Posts are used for content that is new or dynamic (posts are part of your BLOG with the freshest content displaying before older content)
- Posts are typically located under the Categories widget in the sidebar as well as in the 'Featured' and 'Recent Posts' areas of the Homepage
